

# **INFORMATION FOR SWIMMERS AT JÄTKÄNKÄMPPÄ SMOKE SAUNA**

On October 8, 2019, blue-green algae has been found in the water of this beach.

It is possible that the amount of algae will increase so that the swimmer may develop skin, respiratory or eye symptoms.

The amount of cyanobacteria can vary daily, depending on the weather.

The abundant blue-green algae on the water surface or on the beach resembles green paint.

**SWIMMING IS ADVISED TO BE AVOIDED  
DURING CYANOBACTERIAL MASS INCIDENCE.**

## **NOTE!**

The water in sauna showers does not come directly from the lake, so you can use the showers safely.
